BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

MODIFICATION OF PINK BOLLWORM QUARANTINE REGULATIONS

INTRODUCTORY NOTE

The following revision adds the county of Sierra in New Mexico and the Texas counties of Crane, Loving, Upton, and Winkler to the lightly infested areas. While stock raising is the principal industry in these counties, a small amount of cotton is grown. This is carried into the present adjacent regulated areas for ginning. These counties are, therefore, included to authorize the movement of seed to farms and ranches therein for planting and feeding purposes. No other changes are made at this time.

Acting Chief, Bureau of Entomology and Plant Quarantine.
